

Slip String Flush Tool

The Slip String Flush Tool allows for a tubing flush and load in one action without the need for a flushby truck on site.

The hydraulic activated ram allows for the tubing string to be lifted and bottom sleeve ports opened flushing the tubing and loading the well with as little as a pressure truck.

Advantages

- Flush tubing string and load well in one action without a flushby truck.
- Hydraulic action moving tubing up and down breaks sand bridges.
- Tubing volume and head pressure used for initial flush/load.

Slip String Flush Tool: NO FLUSHBY TRUCK NEEDED!
